SEO - Beginner
Git - Beginner
HR Management - Beginner
Stakeholder Alignment - Beginner
Roadmap Presentation - Beginner
Cross-team Communication - Beginner
Feedback Loops & Iteration - Beginner
Competitor Benchmarking - Beginner

Angelo Facecchia

Senior Software QA Engineer

PROFILE

Software QA engineer with 15+ years of experience in the technology industry with a strong background in identifying and resolving software defects.

Committed to ensuring the highest product quality through rigorous testing and quality control procedures.

Self-motivated and certified Software Tester with a lot of experience in:

- client-server applications,
- web applications,
- mobile applications.

Great knowledge of:

- software development models like Waterfall and Agile,
- testing techniques like black box, white box, and experience-based (Exploratory testing and Error guessing).

Great ability to coordinate work and commitments, set priorities, and take responsibilities acquired through versatile experience.

Ability to work in high-pressure situations, experience gained from the management of relations with the public/clients in different work environments.

Main interests in Human-Machine Interface, User experience design, Usability testing, and Security testing.

PROFESSIONAL EXPERIENCE

Senior Software QA Engineer, *Speakly OÜ*, Tallinn

October 2025 – January 2026

- Acted as the primary QA responsible for mobile (iOS/Android), web, and backend quality validation.
- Designed and structured QA processes, including release sanity checks, bug reporting guidelines, and QA documentation in Confluence.
- Defined critical user and revenue-impacting flows (authentication, learning core flow, subscriptions, payments) and validation checklists prior to production releases.
- Collaborated closely with Product, Design, and Engineering to clarify requirements, identify ambiguities, and assess production risk.
- Established Jira bug reporting templates and QA handover documentation to support future QA team scaling.
- Performed manual exploratory, functional, and regression testing across staging and production environments.

Senior QA Specialist / Product Manager, *Podium North OÜ*, Tallinn

October 2022 – September 2025

- Responsible for leading multiple projects with multiple development teams. Help define and adhere to the group's QA processes.
- Testing applications on different mobile platforms such as Android and iOS devices.
- Run Compatibility Testing (Android/iOS platforms, cross-browsers, and cross-mobile devices).
- Spec out test requirements using product requirements and technical specifications.
- Identify gaps in test requirements if any and ensure that the QA team has a plan in place for the timely delivery of the features/projects.
- Identify areas to improve task efficiency and develop and implement plans to achieve it.
- Actively participate in sprint meetings and estimations, prioritize, and perform testing activities in alignment with business needs.

Market & Trend Research - Beginner
Defining & Tracking KPIs - Beginner
User Engagement Analysis - Beginner
Google Analytics, Mixpanel, Firebase - Beginner
Wireframe Review & Feedback (Figma) - Beginner
Backlog Management (Jira) - Beginner
Requirement Gathering & Refinement - Beginner
Cross-functional Team Collaboration - Beginner
Sprint Planning & Prioritisation - Beginner
Feature Definition (EPICs, Stories, AC) - Beginner

Italian: Native Speaker

English: Upper Intermediate

Estonian: Basic

HOBBIES

Soccer, basketball, running and swimming
Reading

- Identify the scope of regression using an accrued understanding of business and code components.
- Use business analytics and product knowledge to understand the impact of making informed decisions.
- Learned and actively performed SEO practices.
- Led the early-stage product definition of a mobile news app, focusing on user journeys, content structure, and monetisation strategy.
- Created and prioritised the product backlog, coordinated with designers and developers, and refined requirements in alignment with stakeholder goals.
- Defined navigation categories, content models, and engagement features based on user behaviour and competitive research.
- Worked closely with marketing and analytics teams to define KPIs, track engagement metrics, and optimise onboarding and retention flows.

Senior Mobile QA Engineer, **Bolt OÜ**, Tallinn

September 2020 – September 2022

- Created and executed manual test scenarios and test suites.
- Executed manual smoke, functional, regression, system, integration, and exploratory tests for iOS and Android platforms.
- Functional API testing.
- Validated new functionality and ensured the flawless testing process.
- Created and maintained test documentation including test cases, checklists, and test plans.
- Worked with the product manager to ensure requirements were captured correctly.
- Worked with the development team to analyze and resolve defects.
- Shared with stakeholders the manual testing results and possible risks.
- Supported the full cycle of defect tracking and management.
- Collaborated with development teams and quality engineering teams to identify and prioritize opportunities for automation.

Senior QA Specialist, **BetPawa**, Tallinn

May 2019 – September 2020

- Created and executed manual smoke, functional, regression, system, integration, and exploratory tests.
- Involved in testing applications on different mobile platforms such as Android and iOS devices.
- Run Compatibility Testing (Android/iOS platforms, cross browsers, cross mobile devices).
- Analyzing technical issues using logs and databases.
- Creating detailed descriptions of defects for developers.

Senior System Test Engineer / Team Lead, **Cloudmore OÜ**, Tallinn

April 2018 – May 2019

- Defining and creating Test Strategy and Test Plans in Agile methodology.
- Defining and creating acceptance criteria for each user's story during the sprint meeting.
- Defining, creating, and executing test cases based on acceptance criteria.
- Analyzing technical issues using logs and databases.
- Creating detailed descriptions of defects for developers and supporting developers during bug fixing.
- Creating reports of test execution results for management.
- Actively participating in assessing and interviewing candidates for the team.

System Test Engineer, **Kühne+Nagel**, Tallinn

January 2014 – February 2018

- Developed and implemented test cases according to requirements, and analyzed technical issues using server log files, databases, and message validation tools.

- Generated reports on test execution outcomes and provided detailed defect descriptions for developers.
- Offered support to users during user acceptance testing and assisted developers in bug fixing.

Software Quality Control, *SATPROF B.V.*, Tallinn

August 2013 – December 2013

- Developed and implemented test cases tailored to TV smart cards' requirements, along with producing reports on test outcomes and detailed defect descriptions.
- Offered support to developers during bug resolution.

Software Quality Control, *DeltaTre S.p.A.*, Turin

April 2009 – June 2013

- Developed and implemented test cases, including performance and load tests, for web applications.
- Generated comprehensive reports on test outcomes and defect descriptions, while offering support to users during acceptance testing and aiding developers in bug resolution.
- Verified content playback on different platforms (Web, Mobile).
- Checked video and audio quality (resolution, buffering, audio/video synchronization).
- Tested authentication and authorization management.
- Validated user and profile management (create, edit, delete).
- Tested search functionality and content recommendations.
- Tested playback features (resume watching, forward, rewind, playback speed).
- Validated user interface (navigation, consistency, usability).

IT Consultant – Software Quality Control, *HRM / GlaxoSmithKline*, Verona

September 2007 – April 2009

- Defined, created, and executed test cases according to requirements.
- Generated reports on test execution outcomes for management and provided detailed defect descriptions for developers.
- Supported users in the acceptance testing phase and assisted developers in resolving bugs.

EDUCATION

Bachelor of Information Technology — Università degli Studi di Bari, Department of IT — July 2007

ISTQB Certification — Foundation Level — May 2012

Cisco CCST Cybersecurity — Cisco Networking Academy — May 2026
